SKILLS

Design

User flows • Heuristic evaluation • Service design • Concept sketches • Wireframes & mock ups • Information Architecture • User Journeys • Interactive prototypes • Storyboard • Visual design • Style guides & pattern library (Design system) • Accessibility

Tools

Figma • Sketch • Adobe XD • HTML & CSS

Research

Data analysis • Task analysis & persona building • A/B Testing & Experiment • Heuristic evaluation • Usability testing • Quantitative analysis • Qualitative analysis • Interviews

PROFILE

I am passionate about creating user-friendly interfaces, applications and products. I use my skills in user research, UI design, usability testing, prototyping and heuristic evaluation to implement the client's vision.

I am responsible for translating concepts, user needs and business requirements into user flows, wireframes, mockups interactive prototypes and final UI designs that lead to intuitive user experience.

I love solving problems and tackling new challenges. I look to create synergies and cohesion in teams to bring out the best performance and exceed expectations. I like photography, traveling and playing basketball.

EMPLOYMENT HISTORY

UX/UI Designer, FA Solutions Oy

Helsinki, Finland

Jan 2020 — Present

- Timely completion of the projects was ensured while facilitating 10+ members of development team.
- A consistency was established in all user-facing application by creating a design system with new theme and a UI component library.
- Increased user adoption and decreased legal liability for web applications by improving accessibility by following WCAG guidelines.
- Researched and designed a new applications while mapping client requirements, managing developer hand-offs and conducting user and usability tests.
- Enhanced user experience across the board by conducting heuristic evaluation for various features and applications.

UX/UI Designer, Scania AB

Södertälje, Sweden

Aug 2019 — Jan 2020

- Created, delivering innovative concepts, wire frames, low and high fidelity prototypes, and engaging user experiences.
- Researched, created interactive user-centered designs and designed a dashboard to simplify multi-teams processes.
- Task-tracking became more efficient due to dashboard's assisted decision making functionality.

UX/UI Designer - Master Thesis Worker, Scania AB

Södertälje, Sweden

Jan 2019 — Aug 2019

- Conducted research and interviews to investigate the work structure and problems of employees.
- Design solution (a dashboard) was proposed to facilitate coordination among different teams.
- The employees were better and efficient in decision making leading to enhanced user experience.
- Available at: <http://urn.kb.se/resolve?urn=urn:nbn:se:kth:diva-262728>

Collaboration & Teamwork

Organizing workshops ·
Facilitating design critique
· Detail oriented · Flexible
· Communicative · Active
listener · Team spirit

HOBBIES

Apart from design, I
love capturing beauty in
small things, exploring new
places, and listening to
music helps me calm my
nerves.
